ABOUT US

The company is managed by professionals, who have more than two decades of industrial value selling experience in Middle East & Asia. Since its inception in 2008, the company strongly focuses on providing value added services to its customers in the Kingdom of Saudi Arabia and neighboring GCC Countries

Rust Grip®

Super The

SPI Coatings is a global provider of advanced protective coating solutions designed to enhance asset performance, durability, and safety across industrial sectors.

1

Offers high-performance coatings for corrosion protection, thermal insulation, and fire resistance

2

Products are widely used in oil & gas, industrial plants, marine, infrastructure, and energy sectors

3

Focuses on extending equipment life, reducing maintenance costs, and improving operational efficiency

4

Solutions are proven in demanding environments worldwide

PRODUCTS

RUST GRIP

High-performance coating that stops corrosion and protects metal surfaces.

SUPER THERM

Thermal insulation coating that reduces heat transfer and improves energy efficiency.

ENAMO GRIP

Durable protective topcoat providing long-lasting surface protection and finish.

MOIST METAL GRIP

Corrosion protection coating designed for application on moist metal surfaces.

HEGGEL GmbH is a German specialist in high-performance corrosion protection and lining systems for industrial and chemical environments worldwide.

- 1 Develops advanced protective coating and lining solutions for steel and concrete structures.
- 2 Products are widely used in chemical plants, power generation, industrial facilities, and infrastructure projects.
- 3 Focuses on chemical resistance, abrasion protection, and long service life.
- 4 Delivers reliable solutions for demanding and aggressive operating environments.

PRODUCTS

CORROSION PROTECTION COATINGS (HEGGEL CORR)

High-performance coatings with exceptional resistance to chemical corrosion and abrasion.

PROTECTIVE COATING SYSTEMS (HEGGEL COAT)

Durable polymer coatings offering long-lasting protection and excellent adhesion.

GLASS FLAKE COATINGS (HEGGEL FLAKE)

Epoxy coatings reinforced with glass flakes for enhanced diffusion and resistance.

FRP LININGS (HEGGEL FRP)

Fiberglass reinforced polymer linings for chemical and abrasive environments.

DuFlon Industries is a specialized manufacturer of fluoropolymer-lined piping systems and equipment, providing advanced corrosion-resistant solutions for aggressive chemical and industrial environments.

1

Designs and manufactures PTFE, PFA, and FEP lined piping, equipment, and components.

2

Products are widely used in chemical processing, pharmaceuticals, specialty chemicals, and industrial plants.

3

Focuses on corrosion resistance, chemical purity, and long-term operational reliability.

4

Delivers engineered lining solutions for demanding and hazardous service conditions.

PRODUCTS

LINED PIPING SYSTEMS

PTFE/PFA lined piping for corrosion-resistant chemical applications.

LINED EQUIPMENT & VESSELS

Fluoropolymer-lined tanks and vessels for aggressive media.

LINED PUMP & VALVE PARTS

Precision-lined components for pumps and valves.

PTFE NOZZLES & ACCESSORIES

PTFE nozzles and accessories for industrial and gas applications.

FUZE

COMPOSITE INGENUITY.

FUZE delivers advanced composite repair and reinforcement solutions for pipelines and industrial assets, providing fast, reliable, and long-term protection without shutdowns.

1

Provides engineered composite repair systems for damaged pipelines and structures.

2

Solutions are suitable for hot, wet, dry, and fire-risk environments.

3

Focuses on structural integrity, corrosion mitigation, and asset life extension.

4

Used across oil & gas, energy, industrial, and infrastructure sectors.

FUZE PRODUCTS

COMPOSITE INGENUITY.

FUZE HOT

Composite repair system for high-temperature applications

FUZE WET

Composite solution designed for wet or submerged environments

FUZE DRY / DRY

High-strength composite system for dry service conditions

FUZE STR (STRUCTURAL)

Structural reinforcement solution for critical assets

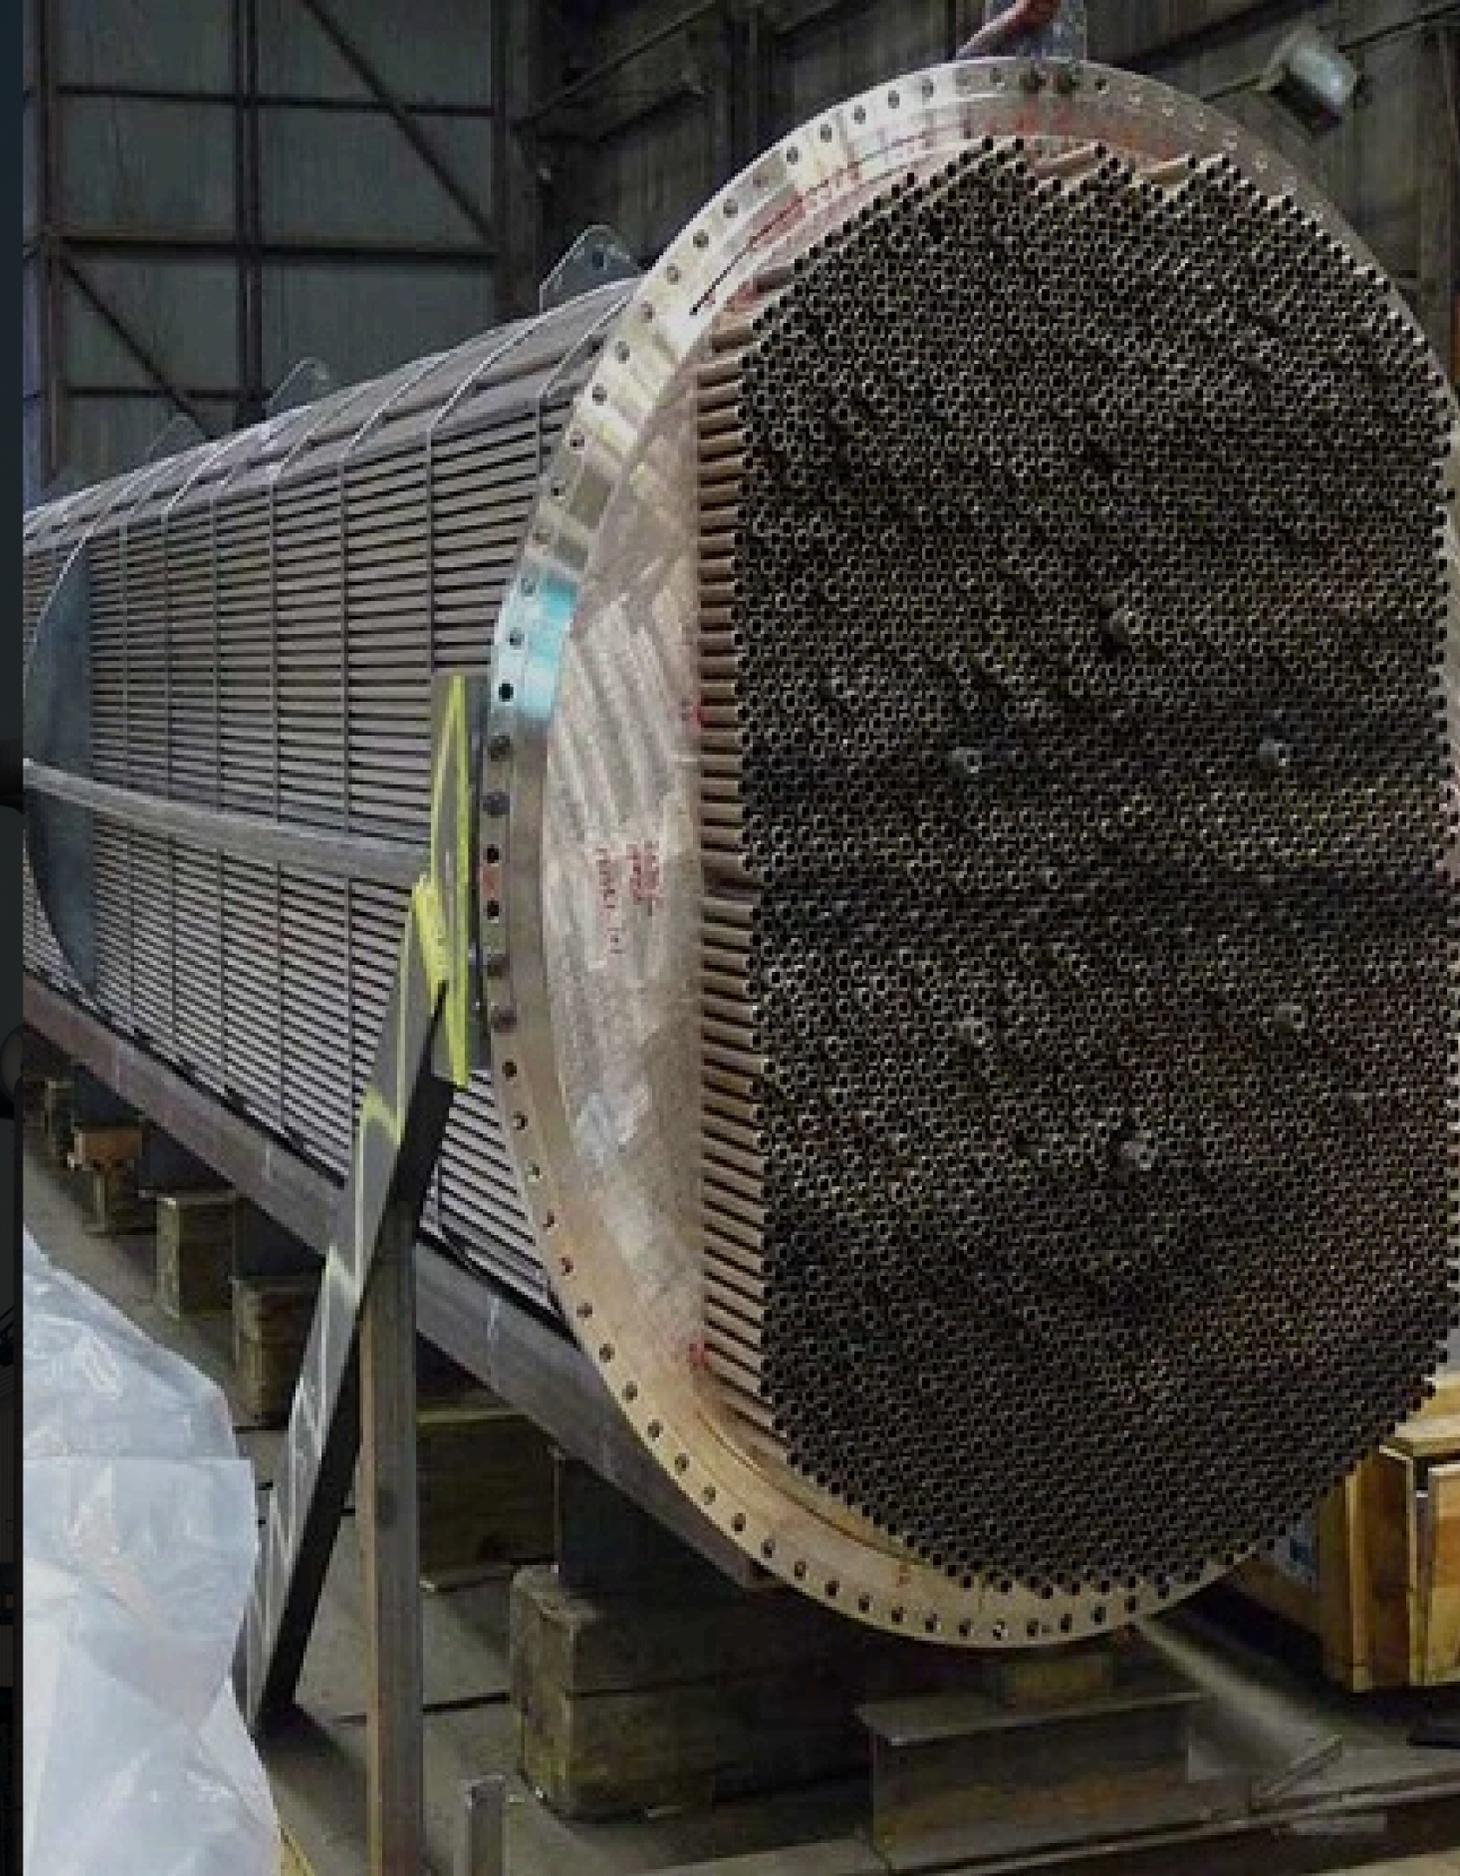

Metal Alloys Corporation is a specialized manufacturer of high-quality condenser tubes and heat exchanger tubing solutions for industrial applications worldwide.

- 1 Manufactures condenser and heat exchanger tubes in copper, brass, and cupro-nickel alloys
- 2 Products are widely used in power plants, oil & gas, marine, HVAC, and industrial systems
- 3 Focuses on high thermal efficiency, corrosion resistance, and long service life
- 4 Supplies reliable tubing solutions for demanding industrial environments

Transparent

Innovative

PRODUCTS

Condenser Tubes

High-efficiency tubes for power plants and industrial condensers.

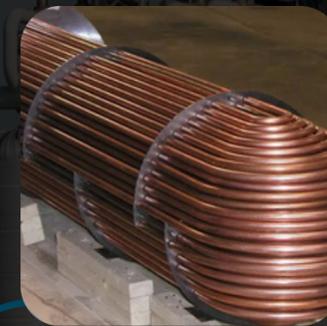

Heat Exchanger Tubes

Durable tubes designed for effective heat transfer systems.

Copper Nickel Tubes

Corrosion-resistant tubes for marine and industrial applications.

Admiralty Brass Tubes

Reliable brass tubes for condensers and heat exchangers.

Finned Tubes

Enhanced tubes to improve heat exchange efficiency.

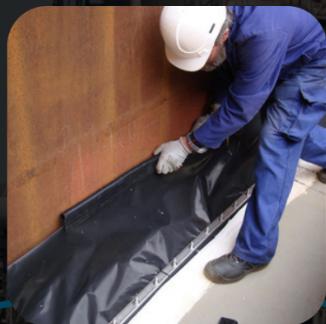

CTS Global provides specialized engineering services for atmospheric storage tanks, supporting safe design, compliance, and long-term operational performance.

- 1 Provides engineering support for storage tank seals, roofs, and accessories.
- 2 Delivers solutions aligned with international standards and regulatory requirements.
- 3 Focuses on safety, emission control, structural integrity, and operational efficiency.
- 4 Supports tank projects across oil & gas, terminals, petrochemical, and energy sectors.

Innovative

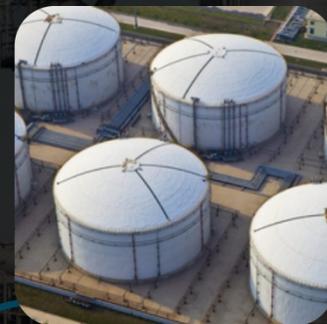

PRODUCTS

Primary & Secondary Seals

Emission control sealing systems for floating roof storage tanks.

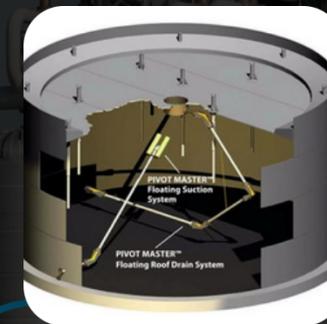

Internal Floating Roofs (IFR)

Lightweight internal roofs designed to reduce vapor losses.

External Floating Roofs (EFR)

Engineered floating roofs for large atmospheric storage tanks.

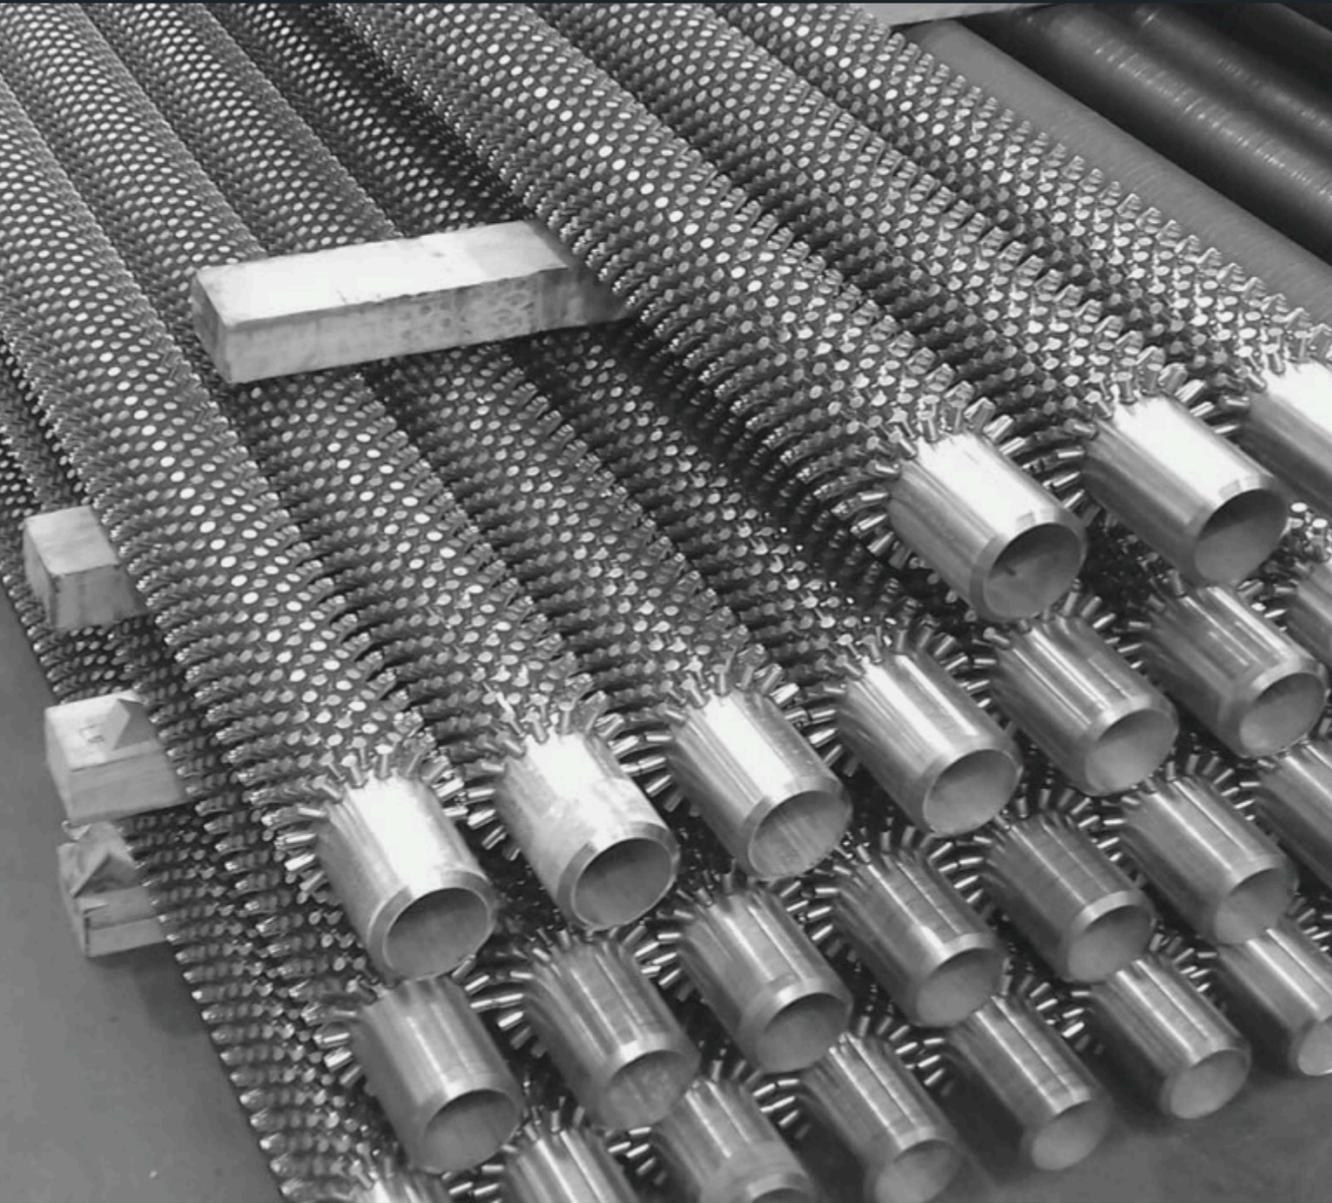

Drain Systems

Roof drain systems for safe rainwater removal from floating roofs.

Tank Accessories

Safety and operational accessories for storage tank systems.

L.P. S.p.A. is an Italian manufacturer of specialized heat transfer equipment, serving petrochemical, oil & gas, and industrial plants since 1976.

1

Produces high-quality finned and studded tubes designed for efficient heat transfer.

2

Manufactures components such as headers, manifolds, heater coils, and convection modules.

3

Supplies custom engineering solutions for cogeneration and petrochemical applications.

4

Committed to reliability, quality, and compliance with international standards.

PRODUCTS

FINNED TUBES

High-efficiency finned tubes for enhanced heat transfer applications

STUDED TUBES

Studded tubes designed for high-temperature and severe service conditions.

Transparent

Innovative

HEATER COILS

Custom-engineered heater coils for petrochemical and industrial heaters

HEADERS & MANIFOLDS

Fabricated headers and manifolds for heat transfer systems

THERMO ENGINEERING

ADVANCED COMBUSTION SYSTEMS

Thermoeng S.r.l. is an Italian engineering and manufacturing company specializing in heat transfer solutions for industrial and energy applications.

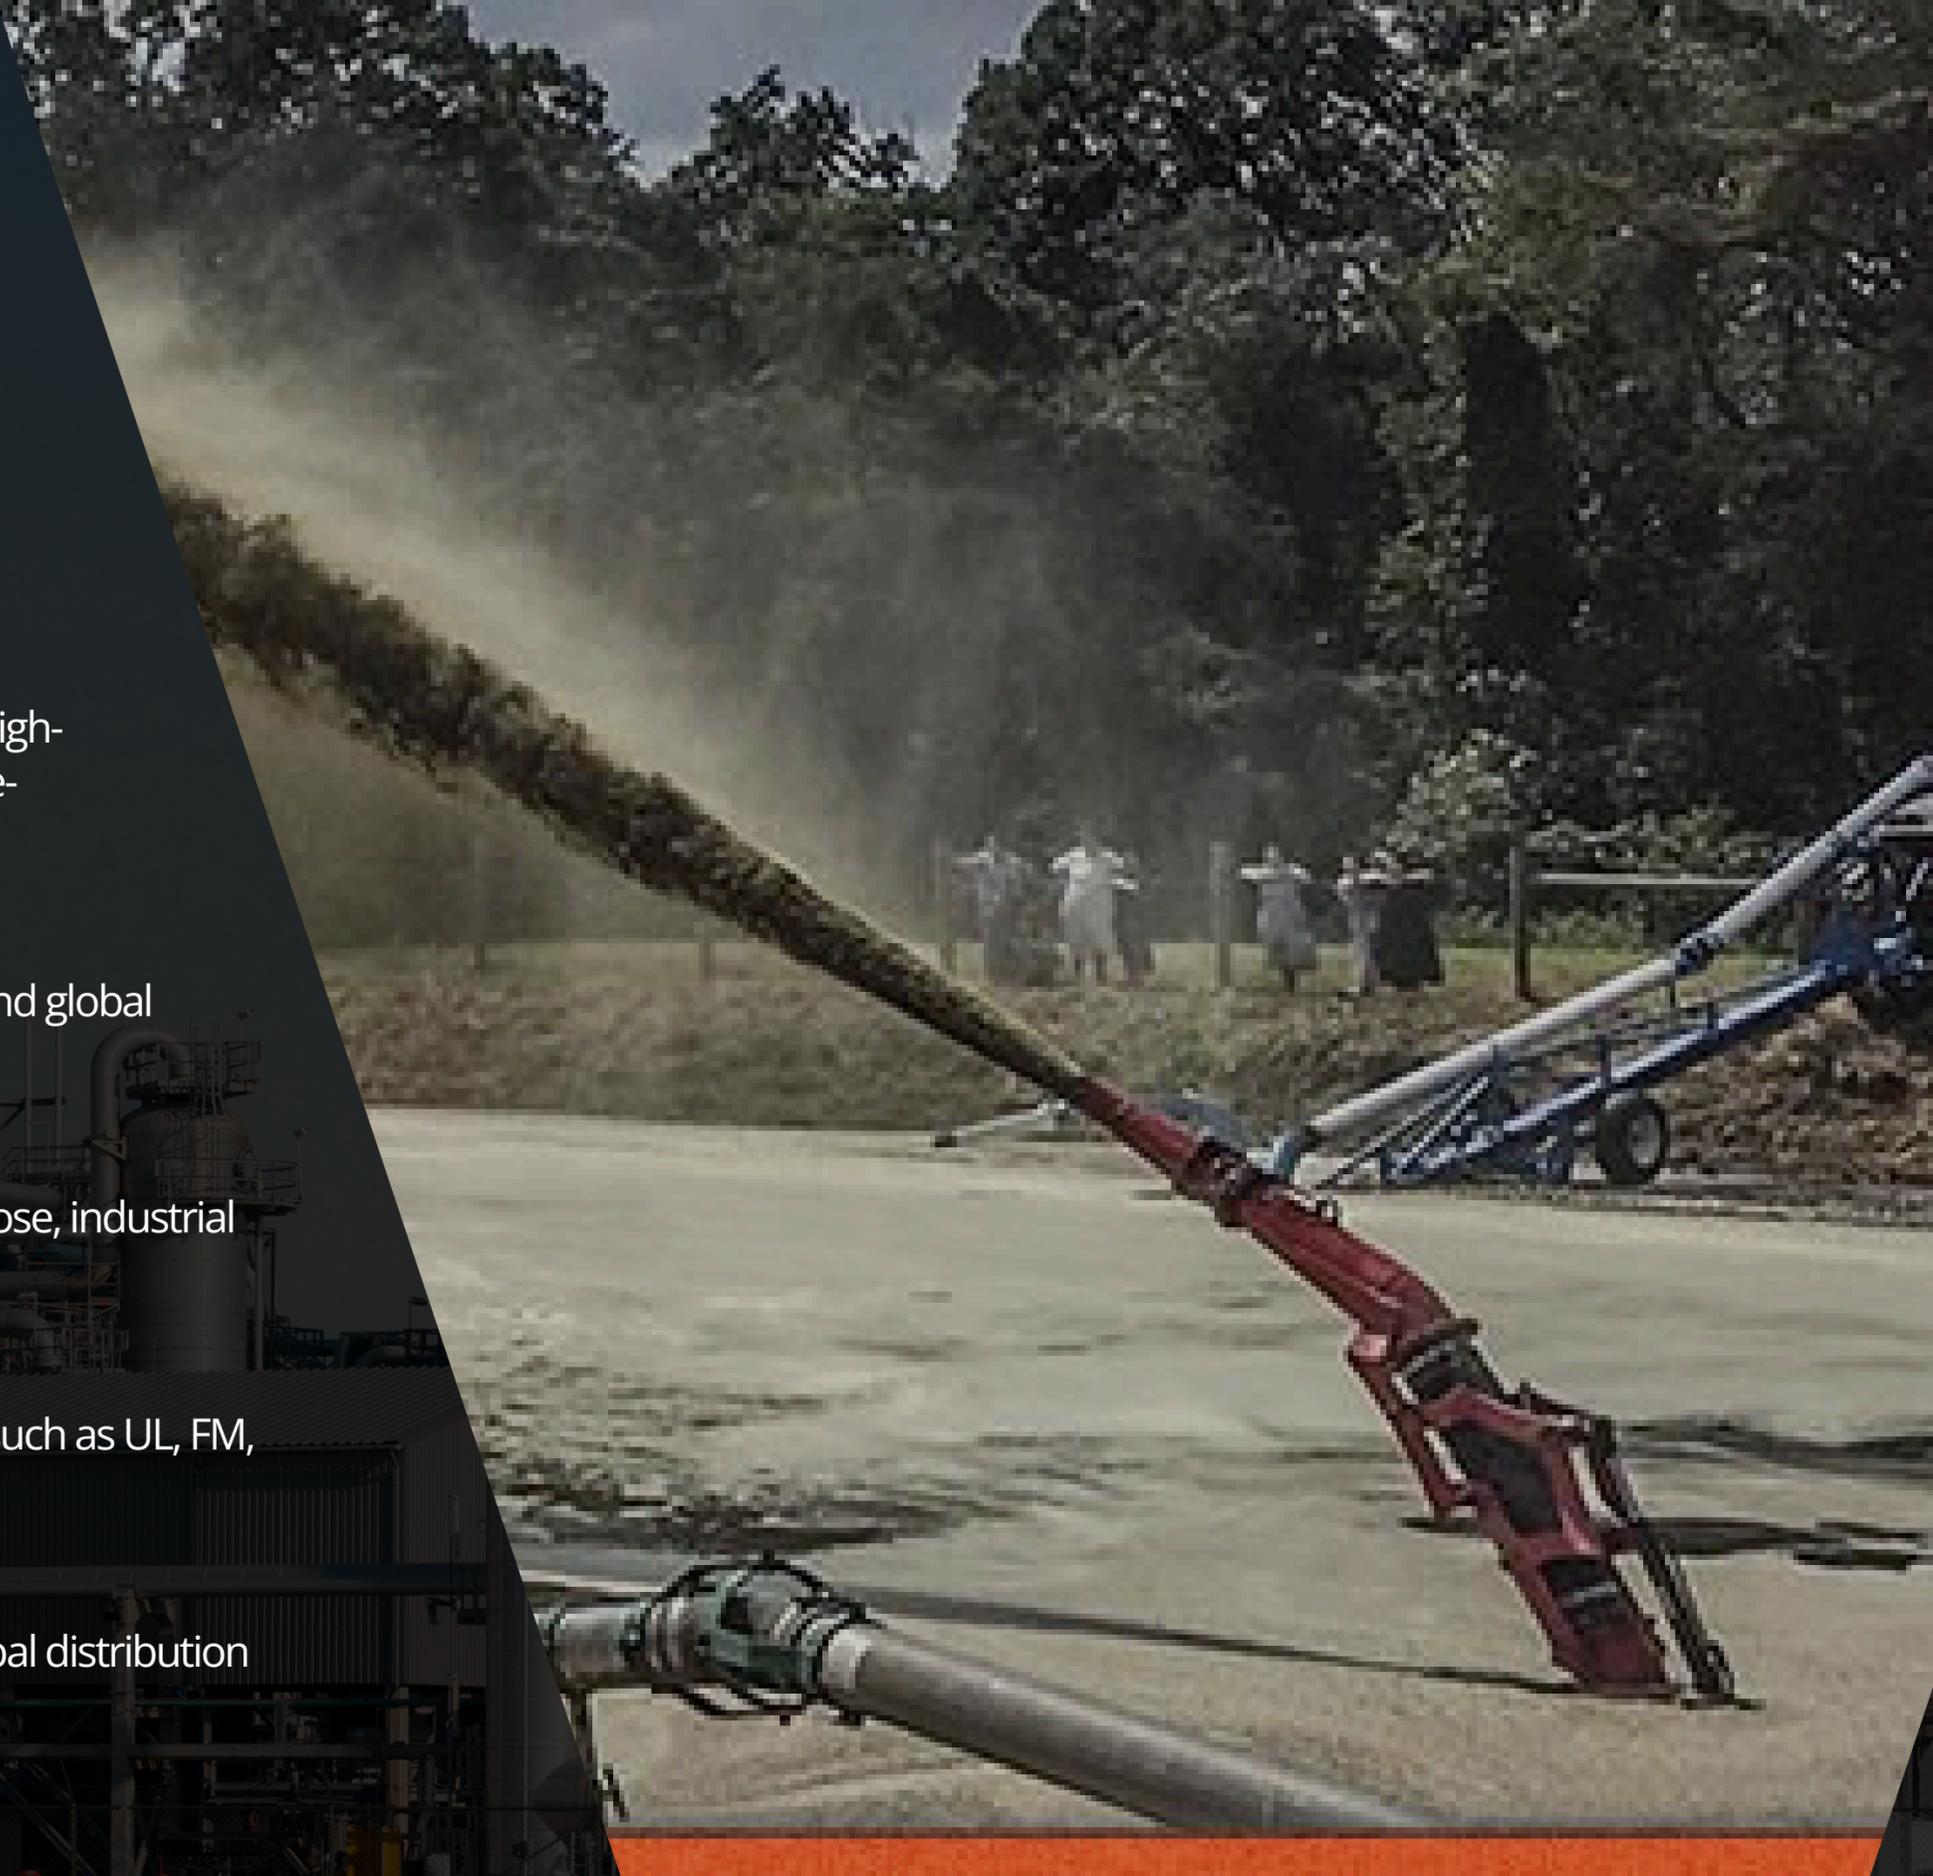

- 1 Designs and manufactures heat exchanger components and thermal equipment.
- 2 Serves oil & gas, petrochemical, power generation, and industrial sectors.
- 3 Focuses on efficiency, reliability, and high-quality manufacturing standards.
- 4 Delivers engineered thermal solutions for demanding operating conditions.

5Elem Hi-Tech Corporation is a leading global manufacturer of high-quality hoses and related solutions for industrial, agricultural, fire-fighting, and fluid transfer applications.

- 1 Founded in 1983, with headquarters in Jiangsu, China, and global operations serving clients worldwide.
- 2 Produces a wide range of hose products including fire hose, industrial hose, agricultural hose, and oil & gas hose.
- 3 Maintains rigorous quality standards with certifications such as UL, FM, EN, DIN, MSHA and more.
- 4 Exports products to over 120 countries, with strong global distribution and tailored solutions.

Emisshield is a U.S.-based company specializing in high-emissivity ceramic coatings designed to improve heat transfer and energy efficiency in industrial thermal systems.

- 1 Provides advanced high-emissivity coatings for industrial furnaces and heat-driven processes.
- 2 Technology is based on NASA-licensed ceramic materials.
- 3 Improves thermal efficiency, reduces fuel consumption, and lowers emissions.
- 4 Used across steel, glass, petrochemical, and power generation industries.

PRODUCTS

HIGH-EMISSIVITY COATINGS

Advanced ceramic coatings that enhance radiant heat transfer

ENERGY SAVING THERMAL COATINGS

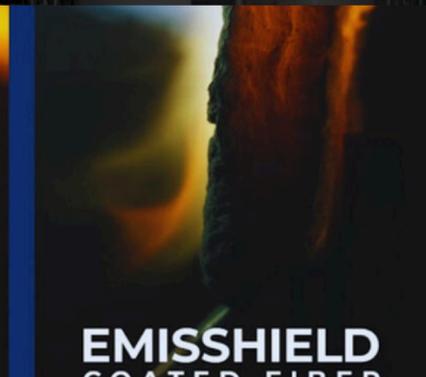

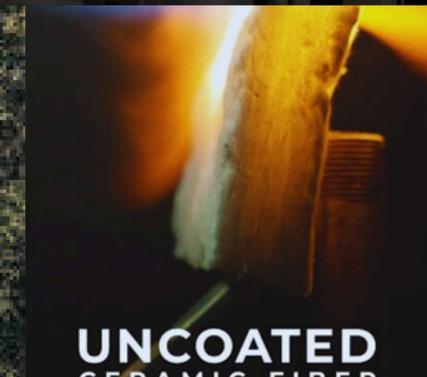

Solutions that reduce energy consumption and operating costs

FURNACE EFFICIENCY COATINGS

Coatings designed to increase furnace productivity and stability

EMISSION REDUCTION COATINGS

Coatings that support lower carbon intensity and emissions.

Sunpower Technology is a Chinese technology-driven engineering and manufacturing company specializing in advanced equipment for the chemical, clean energy, and environmental protection sectors. Headquartered in Nanjing, Jiangsu, China, the company focuses on innovation, energy efficiency, and eco-friendly industrial solutions.

- 1 Leads in high-efficiency heat transfer technology and integrated equipment systems.
- 2 Develops advanced chemical and clean energy equipment including polysilicon and LNG systems.
- 3 Provides energy saving and environmental protection engineering solutions.
- 4 Takes part in major infrastructure projects, such as permafrost treatment engineering for railways.

PRODUCTS

Efficiency Heat Transfer Systems

High-performance heat exchanger and process equipment for industrial applications

Chemical & Polysilicon Equipment

Integrated solutions for chemical processing and solar polysilicon production.

Energy Saving Solutions

Flare gas recycle, wastewater treatment, and waste heat recovery systems.

Permafrost Engineering

Specialized engineering solutions for permafrost stabilization and railway applications.

Protectoseal is a U.S.-based manufacturer specializing in industrial sealing, fire protection, corrosion prevention, and containment solutions for electrical, mechanical, and infrastructure applications.

- 1 Provides engineered sealing solutions for hazardous and critical environments.
- 2 Products are designed to prevent moisture, gas, fire, and corrosion ingress
- 3 Widely used in oil & gas, power generation, industrial plants, and infrastructure projects.
- 4 Focuses on safety, durability, and long-term asset protection.

PRODUCTS

END-OF-LINE CONSERVATION VENT

Protectoseal Series 8540H helps maintain safe pressure/vacuum levels in storage tanks by venting excess vapor while minimizing product loss.

VENT-LINE / IN-LINE FLAME ARRESTER (SERIES 30000)

Series 30000 Flame Arrester prevents external flames from propagating back into vent lines or tank vapor space.

SPRING-LOADED VENTS

Spring-loaded vents (e.g., 9540, 19540, 9240) provide pressure and/or vacuum relief for tank vapor space with adjustable settings.

TANK BLANKETING VALVESB

Blanketing valves control inert gas flow into the tank vapor space to maintain positive pressure and protect product quality.

DRILLING WATER WELLS

DWC provides professional water well drilling services to meet the growing demand for reliable groundwater sources.

Our operations use advanced drilling technologies supported by an experienced technical team, ensuring safe, efficient, and environmentally compliant execution
